EXPERIENCE

HashedBit Innovations

Sep 2025 – Nov 2025

Web Developer Intern Remote

- Built responsive React.js components with Tailwind CSS, improving UI consistency across multiple screens.
- Integrated RESTful APIs and serverless routes to support dynamic, data-driven features.
- Improved frontend performance through component optimization and participated in code reviews to enforce best practices.

IBM

Jul 2025 – Aug 2025

Software Developer Intern Remote

- Developed responsive web interfaces using React.js and Tailwind CSS in an enterprise development environment.
- Implemented REST API integrations enabling seamless frontend-backend communication.
- Collaborated in code reviews and performance tuning to improve application reliability and maintainability.

EDUCATION

Ajay Kumar Garg Engineering College, Ghaziabad

2022 – Present

B.Tech in Computer Science Engineering (Data Science)

TECHNICAL SKILLS

Languages	Python, Java, SQL, JavaScript, HTML/CSS
AI/LLM	Retrieval-Augmented Generation (RAG), Prompt Engineering, Vector Search, Whisper
Frameworks	FastAPI, React.js, Pydantic, PySpark
Data & Analytics	Pandas, NumPy, Matplotlib, Seaborn, EDA
Cloud & Big Data	AWS (S3, Lambda), Hadoop, Hive
Databases	MySQL, MongoDB, FAISS
Core Concepts	DSA, OOP, REST APIs, Async Programming, Machine Learning

PROJECTS

MentorAI — RAG-Based AI Teaching Assistant

2025

 GitHub

- Architected an end-to-end Retrieval-Augmented Generation (RAG) pipeline using embeddings and vector similarity search.
- Integrated OpenAI Whisper for automated video-to-text transcription and semantic indexing of long-form content.
- Improved answer relevance through prompt engineering, semantic chunking, and retrieval optimization techniques.

IntelliDoc AI — Agentic Multi-Source RAG Assistant

2025

 GitHub

- Built a production-ready agentic AI assistant with multi-source ingestion and advanced RAG pipeline using embeddings and vector similarity search.
- Implemented dynamic tool-calling (calculator, web search, summarization) and stateful conversation memory for multi-turn interactions.
- Developed scalable FastAPI backend with async endpoints, streaming responses, and Dockerized deployment for real-time AI systems.

AutoLink — Smart Driver-Passenger Connector

May 2025 – Present

 GitHub

- Developed a Python and FastAPI backend with WebSocket-based real-time communication for live matching.
- Implemented a Haversine distance-based matching algorithm to reduce passenger wait times and improve allocation efficiency.
- Deployed asynchronous background tasks using Celery and Redis with Dockerized services and health monitoring.

ACHIEVEMENTS

- Solved 250+ LeetCode problems focusing on data structures, algorithms, and time-space optimization.
- Delivered production-ready features, APIs, and data workflows during internship projects.
- Built and demonstrated AI- and cloud-based prototypes.
